

# Financial Warehousing: Reporting Suite

## Overview:

The financial warehouse is delivered with a fully configured suite of reports. This allows the benefits of the solution to be returned in a very short time period.

*“What types of reports are included”*

1. Profit and loss balance sheet and cash flow
2. Detailed drill through reports
3. Key metric and ratio reports
4. Departmental management reports

The selection of parameterised reports arrive fully configured to operate over the financial warehouse.

## How does the reporting suite work?

Because the financial warehouse is a very conformed structure it has been possible to deliver a reporting suite that truly works in its standard form:

### Data structure

1. Mater data services holds enough context to support the structure of every reporting suite
2. Due to the relatively standard nature of financial ledges it is possible to have reports that will be suitable for all organisations

### Report structure

1. All the reports in the suite are configured to interact with each other
2. The reporting style and structure have been formed from recommendations over many years

## Benefits of Financial Warehousing – Reporting Suite

The extensive suite of reports will allow financial management to be both quick and accurate. Using these reports you will be sure you are gaining maximum benefit from your financial data.
